Team

ID	Name	Email	Mobile
20170227	Mohamed Hamdy Mohamed	m.hamdy5474@gmail.com	
20170045	Islam Saleh Ahmad	eslamsaleh5668@gmail.com	

Document Purpose and Audience

- Any document anywhere should tell us 2 things:
 - what this document is : football playgrounds
 - who is expected to read it: administrator and software's engineers that intersected to learn how develop software engineering documents
- Write in simple notes: booking system for football playgrounds
- List the target audience to read this document (e.g. administrator? software's engineers?)

II. Class Descriptions

Class ID	Class Name	Description & Responsibility
1	UserAccount	An abstract class (generalization) that holds the common properties between a Player and a Playground Owner
2	Player	A class that inherits UserAccount, It allows player to book playgrounds and do player functionalities.
3	PlaygroundOwner	A class that inherits UserAccount, It allows an owner to add (own) playgrounds and control them and do more functionalities.
4	Playground	A class that hold the attributes and operations that are done on a Playground, and it is owner by a PlaygroundOwner
5	PlayGroundSchedule	Every class should has PlayGroundSchedule class, It save all playground booking time in every day and it will display all time slots and use for another functionalities like setschedule and displayFreeSlots and it allow to owner to update playground slotsif he want.
6	eWallet	A class that has the responsibility of controlling financial operations in the system, and can be connected to an outside method like Fawry, and any User must have one eWallet.
7	Administrator	A class that can do special operations concerning playgrounds such as delete or suspend a playground and view all complaints and do another functionalities.
8	SystemUI	A boundary class for enabling users to sign up and login to the system,
9	PlayerUI	A boundary class for enabling players to interact with the system, book playgrounds, etc.
10	PlaygroundOwnerUI	A boundary class for enabling owners to interact with the system, add playgrounds, review their current bookings, etc.
11	AdminUI	A boundary class for enabling admins to control playgrounds, like activating, suspending or deleting a playground

Class - Sequence Usage Table

Sequence Diagram	Classes Used	All Methods Used
Register a new user	Class SystemUI Class UserAccount	signUp() checkUsername() checkEmail() checkStrongPassword() User() viewInfo()
Add a Playground	Class SystemUI Class PlaygroundOwner Class Playground Class Administrator	addPlayground() Playground() addPlayground(playground) playground() notifyAdmin()
Book a Playground	Class SystemUI Class Player Class Playground Class eWallet	bookPlayground() bookPlayground(playground, timeslot) transfer(amount, owner)
Create a Team	Class SystemUI Class Player	createTeam() createTeam(usernames)
